

UNDER THE HOOD - PEUGEOT 208

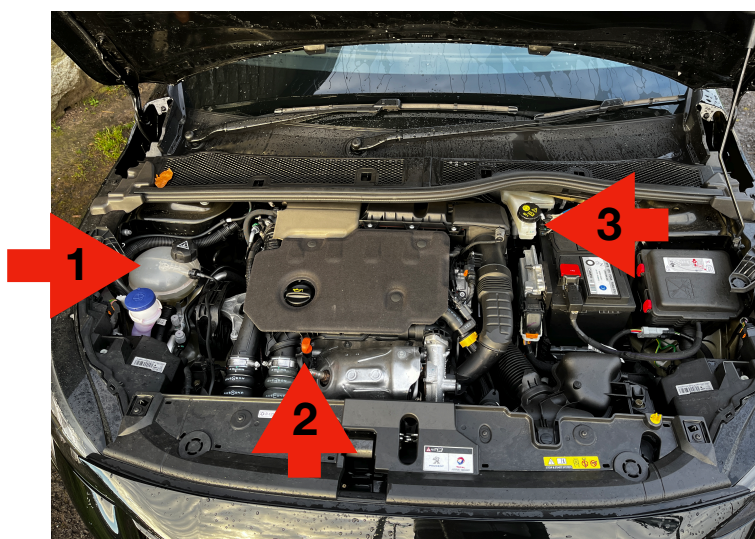

Open the hood catch located near front passenger door.

Then locate the secondary catch on the hood, helps if you crouch down and look for the gap to push your fingers in, the catch pushes upwards to release.

Secure with the kickstand

1. Engine Coolant, level must be within the Min and Max line visible on side of the bottle

2. Engine Oil, pull out the dipstick when the engine has been off for a while, clean it with a clean rag, re-insert and pull out again to get a reading between the Min and Max line on the stick

3. Brake Fluid, level must be within the Min and Max line visible on side of the bottle
